

Positions

08.2024 – 09.2024 **Research visit (Wuchen Li at the University of South Carolina)** (Accelerated Stein metric gradient flows with general bilinear kernels on Gaussian families.)

In the Applied Mathematics group at Technical University Berlin.

08.2023 – **PhD candidate** (with teaching responsibilities from 2024 on, funded by the German Federal Ministry of Education and Research under the project “VI-Screen” until then.)

04.2023 – 07.2023 **PhD Stipend** (Researching Wasserstein gradient flows with respect to the Rényi divergence and entropy.)

06.2021 – 03.2023 **Student research assistant** (Research on Wasserstein gradient flows, writing a script for the lecture “Approximation theory” and rewriting the script for the lecture “Convex Analysis” in the setting of infinite-dimensional spaces, proofreading manuscripts.)

At the Department of Mathematics, Technical University Berlin.

10.2019 – 03.2021 **Tutor** (Giving tutorials and correcting homework for the lectures “Functional Analysis I”, “Differential Equations I” and “Linear Algebra for Engineers”.)

Publications

22.07.2025 **R. Duong, V. Stein, R. Beinert, J. Hertrich, G. Steidl: Wasserstein Gradient Flows of MMD Functionals with Distance Kernel and Cauchy Problems on Quantile Functions** (Accepted subject to minor modifications by the journal ESAIM: Control, Optimisation and Calculus of Variations)

06.2025 **V. Stein, W. Li: Accelerated Stein Variational Gradient Flow** (Accepted for publication in the Springer LNCS proceedings of GSI'25: Geometric Science of Information)

05.06.2025 **R. Duong, N. Rux, V. Stein, G. Steidl: Wasserstein Gradient Flows of MMD Functionals with Distance Kernels under Sobolev Regularization** (Phil. Trans. R. Soc. A. volume 383 issue 0243 "Partial differential equations in data science")

04.2025 **V. Stein, S. Neumayer, N. Rux, G. Steidl: Wasserstein Gradient Flows for Moreau Envelopes of f -Divergences in Reproducing Kernel Hilbert Spaces** (Accepted for publication by the journal "Analysis and Applications".)

Preprints

30.04.2024 **Interpolating between Optimal Transport and KL regularized Optimal Transport using Rényi Divergences** (Joint work with Jonas Bresch (TU Berlin). Submitted in revised form to the Journal Results in Mathematics.)

Talks

31.10.2025 **Accelerated Stein Variational Gradient Flow** (GSI'25: Geometric Structures of Statistical & Quantum Physics, Information Geometry, and Machine Learning (Saint-Malo, France))

??.09.2025	Wasserstein Gradient Flows for Moreau Envelopes of f-Divergences in Reproducing Kernel Hilbert Spaces (MML'25: Conference on Mathematics of Machine Learning 2025 (Hamburg, Germany))
21.04.2025	Accelerated Stein Variational Gradient Flow (UCLA level set seminar (Stan Osher))
12.09.2024	Interpolating between Optimal Transport and KL regularized Optimal Transport using Rényi Divergences. (University of South Carolina Mathematics Graduate Colloquium)
30.08.2024	Wasserstein Gradient Flows of MMD Functionals with Distance Kernel and Cauchy Problems on Quantile Functions. (Joint Applied and Computational Mathematics (Changhui Tan & Siming He) and RTG data science seminar (Wuchen Li), University of South Carolina.)
19.08.2024	Wasserstein Gradient Flows for Moreau Envelopes of f-Divergences in Reproducing Kernel Hilbert Spaces (UCLA level set seminar (Stan Osher))

Posters presentations at conferences

08.2025	MSML'25 (Napoli, Italy) (Accelerated Stein Variational Gradient Flow)
10.2024	SIGMA (Signal - Image - Geometry - Modelling - Approximation) Workshop (Wasserstein Gradient Flows for Moreau Envelopes of f -Divergences in Reproducing Kernel Hilbert Spaces, Poster)
06.2024	Learning and Optimization in Luminy (LOL) (Wasserstein Gradient Flows for Moreau Envelopes of f -Divergences in Reproducing Kernel Hilbert Spaces.)
103.2024	Workshop on Optimal transport from theory to applications - Interfacing dynamical systems, optimization and machine learning (Wasserstein Gradient Flows for Moreau Envelopes of f -Divergences in Reproducing Kernel Hilbert Spaces.)

Teaching

Winter 2025/26	Harmonic Analysis (Lecture assistant)
Elective advanced module in the Mathematics program.	
Winter 2025/26	Numerical Analysis (Tutor)
Third-semester's compulsory module (in German) in the Mathematics Bachelors program.	
Summer 2025	Mathematical Physics II - Statistical Mechanics (Lecture assistant)
Advanced BMS module for masters students in the Mathematics program.	
Summer 2025	Probability Theory I - Statistical Mechanics (Tutor)
Compulsory fourth-semester undergraduate course in the Mathematics program.	
Winter 2024/25	Analysis II for Mathematicians (Tutor)
Compulsory module in the Mathematics program, covering multidimensional differentiation.	
Winter 2024/25	Harmonic Analysis (Lecture assistant)
Elective advanced module in the Mathematics program.	
Summer 2024	Convex Analysis (Lecture assistant)
Elective advanced module in the Mathematics program.	
01.2024 - 02.2024	Numerical Mathematics I (Lecture assistant)
Third-semester's compulsory module (in German) in the Mathematics Bachelors program.	

Education

04.2021 – 05.2023 Mathematics Master (Technische Universität Berlin. Final grade: 1.1)

Focus on further Functional Analysis topics as well as Topology, Differential Geometry, Complex Analysis and Statistics. Master's thesis: Wasserstein gradient flows - with an eye towards positive matrix-valued measures. Supervised by Prof. Gabriele Steidl and Dr. Robert Beinert.

10.2017 – 04.2021 Mathematics Bachelor (Technische Universität Berlin. Final grade: 2.0)

Focus on Functional Analysis and Differential Equations with a minor in Machine Learning. Bachelor's thesis: Atomic Norm Minimisation for Superresolution. Supervised by Prof. Gabriele Steidl and Dr. Robert Beinert.

Supervised Thesis

03.2025

Roxane Leitheiser, Technische Universität Berlin (Wasserstein Gradient Flows of the MMD with Riesz Kernels on the Real Line. Bachelor's thesis. 1st supervisor: Gabriele Steidl.)

Community service

I have reviewed for the Journal of Optimization Theory and Applications (JOTA), Transactions on Machine Learning Research (TMLR) as well as a for the Bayesian Decision-making and Uncertainty Workshop at NeurIPS 2024.

Awards

At the 17. annual Dies Mathematicus in 2022 at the TU Berlin I received a prize for the best Bachelor's thesis talk.

IT Skills

I have a good knowledge of Python, including torch and using a HPC cluster. Furthermore, am comfortable with MATLAB and well versed in \LaTeX .

Volunteer work

In the school year 2022/23 I have been tutoring around fourteen seventh-graders in weekly sessions discussing mathematical puzzles and questions from the German Mathematical Olympiad.

I have also served as corrector at the team competition at the Tag der Mathematik 2022 (Mathematics Day) organized by the three Berlin universities, where sixty-nine teams of high schoolers participated.

Language skills

My native language is German. I have received English lessons since preschool and in Primary and Middle School, where many subjects were taught in English by native speakers. Furthermore I have been instructed in Spanish by native speakers from grade four to grade ten and started teaching myself French in December 2023.
